Here's how we can set these cases up for [REDACTED].

I'll write him a brief covering note and mention that in the case of ~~68-1114~~ 68-1114 he may wish to get TSD's reply back before he sends to FI/D and SB.

Also, on 68-3 we need to send an interim ltr to suggester briefly saying that [REDACTED] appropriate organization officials are still studying the potential benefits of his idea. "As soon as final conclusions have been reached we will inform you [REDACTED] promptly, etc."

ILLEGIB

*Gary*

We should also send an interim ltr to suggester of 67-284 briefly telling him that the idea in his proposal has been explored before." However, we are making additional study to determine if your idea makes an added contribution to this area of technology."
